

## DEPILATORY ANYWHERE™ - SOFT WAX

### FACIAL TREATMENT PROTOCOL

**Treatment:** This client-exclusive, self-heating portable depilatory wax system melts on-demand in 3-5 minutes with Lava Gel® mineral energy activated by lavender AromaVapor® Solution. Eliminates the hassle of long melt times and is perfect for off-site, remote and mobile services.

**Benefits:** Comfortably removes hair from all body parts.

**Products and Tools Needed:** 1 Depilatory Anywhere Soft Wax Kit

**Duration:** 10-15 minutes

#### STEP ONE

Activate Depilatory Anywhere Soft Wax according to directions on package.

#### STEP TWO

Clean and prep client's skin with appropriate pre-wax products and apply powder to skin of area being treated.

#### STEP THREE

Test temperature of wax on forearm prior to application.

#### STEP FOUR

Use wooden paddle stick to apply wax to large areas such as arms or legs and use small wax sticks on smaller areas such as the lip or brows. Application should be as thin as possible.

#### STEP FIVE

Place white pella strip over the wax, pressing firmly, then quickly pulling the pella off in opposite direction, avoiding lifting upward on skin. Continue this technique until all treatment areas are completed.

#### *Caution*

Do not wax using soft wax over the same area multiple times as this can cause the skin to lift.

#### STEP FIVE

Complete service using post waxing product to remove wax residue off the skin. Apply calming cream.

#### *Pro Tip*

Since this is a client-exclusive depilatory service, there is no precaution needed regarding double-dipping. You can keep reusing the same wax stick applicator directly into the disposable wax cup.
