

## DEPILATORY ANYWHERE PROTOCOL

**Treatment:** This client-exclusive, self-heating portable depilatory wax system melts on-demand in 3-5 minutes with thermaBliss technology activated by water. Eliminates the hassle of long melt times and is perfect for off-site, remote and mobile hair removal services.

**Benefits:** Comfortably removes hair from all body parts.

**Supplies:** 1 Depilatory Anywhere - Hard Wax Kit

**Duration:** 20-30 minutes

### STEP ONE

Activate Depilatory Anywhere according to package instructions.

### STEP TWO

Clean and prep client's skin with appropriate pre-wax products.

### STEP THREE

Stir the wax well and test temperature on forearm prior to application.

### *Pro Tip*

*Wax will stay warm and workable for 20-30 minutes after activation. This is the timeframe you have to complete your hair removal services.*

### STEP FOUR

Use wooden stick to apply hard wax to skin using thin layers over one another, creating one thick layer.

### STEP FIVE

Using stick, lift the corner of the wax in the direction opposite of the hair growth. Hold skin taught against the direction of pulling, then quickly pull the hardened wax off the skin, avoiding lifting up the skin.

STEP SIX

Repeat until treatment area is complete with hair removal.

*Pro Tip*

*You may use hard wax on the previously waxed area again.*

STEP SEVEN

Complete service using post waxing product to remove wax residue off the skin. Apply calming cream.

*Pro Tip*

*Since this is a client-exclusive depilatory service, there is no precaution needed regarding double-dipping. You can keep using the same wax stick applicator directly into the disposable wax cup.*
